

2014 – 2017 Twin Cooled Cup Holder

Installation Instructions

Using your hands or a non-marring tool, carefully pry the cover of the lower fairing.

The Hog Trough glove box door will replace the cover you just removed.

To install the Hog Trough Glove Box Cover with Cup Holder, place the metal tab on the Hog Trough glove box door behind the bottom lip of the lower fairing.

Once placed, tilt the glove box cover up, and turn the key (or the tab on the keyless lock) to lock it into place.
